NACER EDDINE MISSOUNI

AI Engineering & Data Science

missouni23@gmail.com — +213672807755 — LinkedIn — GitHub

SUMMARY

AI Engineering & Data Science professional specializing in enterprise AI systems, intelligent workflow automation, and production-oriented backend engineering. Experienced in designing agentic AI solutions, integrating LLMs into business workflows, and building scalable data pipelines across telecommunications and e-commerce domains.

SKILLS

Artificial Intelligence: Large Language Models (LLMs), Agentic AI, Generative AI, LangGraph, Prompt Engineering, Human-in-the-Loop AI, AI Workflow Orchestration, Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), OCR

Machine Learning & Data Science: Scikit-learn, Supervised & Unsupervised Learning, Active Learning, Feature Engineering, Model Evaluation, Statistical Analysis, Data Mining, Exploratory Data Analysis (EDA)

Backend & Software Engineering: Python, FastAPI, REST APIs, API Design, Backend Integration, Authentication, Queue-Based Systems, Event-Driven Workflows, Scheduling, System Integration, DevOps, Software Testing, Agile

Data Engineering & Governance: SQL, PostgreSQL, MySQL, Data Pipelines, Data Governance, Data Stewardship, Data Quality, Metadata Management, Data Catalogs, Data Dictionaries, Business Glossaries, Data Lineage

Tools: Git, GitHub, Linux, React, Docker, Google Gemini, GLiNER, PaddleOCR, RapidFuzz

EDUCATION

National Higher School of Artificial Intelligence (ENSIA) 2023 - Present
Engineer's and Master Degree in AI Engineering & Data Science

EXPERIENCE

AI Workflow Engineer & Team Lead Intern - Djezzy Jun 2026 - Jul 2026
On-site

- Led a cross-functional team of five to deliver an AI workflow automating enterprise SNOC support operations.
- Engineered agentic workflows using LangGraph, FastAPI, and LLMs to orchestrate business processes and external services.
- Contributed to a solution targeting an estimated **273M DZD annual business shortfall** caused by blocked POS terminals.

Data Governance & Data Steward Intern - MajestEYE Jun 2026 - Jul 2026
On-site

- Governed enterprise data through metadata management, data catalogs, and business glossaries.
- Defined and monitored data quality standards to improve consistency, reliability, and discoverability.
- Produced governance dashboards, lineage documentation, and enterprise data quality reports.

Backend AI Engineer Intern - Digital Casa (Kayroo Connect) Jul 2026 - Aug 2026
Remote

- Developed the integration layer connecting AI agents, e-commerce platforms, and Meta Marketing APIs.
- Built scalable backend services for synchronization, authentication, scheduling, and queue-based workflows.
- Enabled automated campaign generation with human approval before publication.

AI & Data Pipeline Intern - TEMACINA (DataIntelAI) Jul 2026 - Aug 2026
On-site

- Engineered multilingual OCR-to-data pipelines transforming business documents into validated enterprise records.
- Developed AI-powered extraction, normalization, and validation workflows using OCR, NLP, and LLM technologies.
- Integrated structured data into downstream AI and business intelligence services.

PROJECTS

AlMouhasib - AI Accounting Assistant
Developed an AI-powered accounting assistant that extracts financial data from invoices and generates ERP-ready accounting entries using intelligent document processing.

Adaptive Examination System
Designed an active learning system that dynamically selects the most informative questions while maintaining prediction accuracy.
